Preface

A reference work of this magnitude could not be completed without the dedication of a team of people, not all of whom usually get the recognition they deserve.

We wish to express our thanks to Gayle Hardin, word processing supervisor, and Teresa Welch, word processing operator, who devoted nearly a year of their time to keying every letter and number in this book. Eunice Uganabo, word processing operator, was also a member of that team in the first few months.

Carroll Greenhill and Mark Andrews gave valuable computer programming support.

Dana Stone did significant research and planning in the early stages of the project.

Terry Henderson, art director at the University Relations Office, designed the cover and the spine for this book.

Carl E. Ferguson, Jr., Deborah Hamilton, Ahmad Ijaz, Kathryn Rivers, Sun-Ja Park, Susan Krause, Melissa Foster, Melissa Heinrich, and Robin Taylor supported this project by providing encouragement, moral support patience and expert advice.

We appreciate every contribution and thank all for their participation.

New capital Expenditures (millions)	378.9	355.1	1,318.9	1,540.2

* Includes establishments with payroll at any time during the year.

** Value added by manufacturer for 1982 is computed using inventory data reported at cost or market prior to any adjustment to LIFO cost. This uniform instruction is a change from prior years in which respondents were permitted to value their inventories using any generally accepted accounting method. Consequently, 1982 data for value added by manufacture are not comparable to prior year data.

*** Aggregate of cost of materials and value of shipments includes extensive duplication since products of some industries are used as materials by others.

* Includes operating manufacturing establishments and auxiliaries.

** Value added by manufacture for 1982 is computed using inventory data reported at cost or market prior to any adjustment to LIFO cost. This uniform instruction is a change from prior years in which respondents were permitted to value their inventories using any generally accepted accounting method. Consequently, 1982 data for value added by manufacture are not comparable to prior year data.

*** Aggregate of cost of materials and value of shipments includes extensive duplication, since products of some industries are used as materials by others.

** Statistics for some industry groups and industries are withheld to avoid disclosing data for individual companies. However, for such industry groups and industries with 150 employees or more, number of establishments is shown and employment range is indicated by one of the following symbols: AA-150-249 employees; BB-250-499 employees; CC-500-999 employees; EE-1,000-2,499 employees; FF-2,500 employees or more. Statistics for industry groups shown include data for all component industries regardless of whether data are shown for individual industries in the group.

** Value added by manufacture for 1982 is computed using inventory data reported at cost or market prior to any adjustment to LIFO cost. This uniform instruction is a change from prior years in which respondents were permitted to value their inventories using any generally accepted accounting method. Consequently, 1982 data for value added by manufacture are not comparable to prior year data.

*** Aggregate of cost of materials and value of shipments includes extensive duplication, since products of some industries are used as materials by others.

* Includes operating manufacturing establishments and auxiliaries. Includes counties with 450 employees or more and industry groups and industries with 450 employees or more within counties.

** Includes establishments with payroll at any time during year.

*** Statistics for some industry groups and industries are withheld to avoid disclosing data for individual companies. However, for such industry groups and industries with 150 employees or more, number of establishments is shown and employment size range is indicated by one of the following symbols: AA-150 to 249 employees; BB-250 to 499 employees; CC-500 to 999 employees; EE-1,000 to 2,499 employees; FF-2,500 employees or more. Statistics for industry groups shown include data for all component industries, regardless of whether data are shown for individual industries in the group.

* Includes operating manufacturing establishments and auxiliaries. Includes counties with 450 employees or more and industry groups with 450 employees or more within counties.

** Value added by manufacture for 1982 is computed using inventory data reported at cost or market prior to any adjustment to LIFO cost. This uniform instruction is a change from prior years in which respondents were permitted to value their inventories using any generally accepted accounting method. Consequently, 1982 data for value added by manufacture are not comparable to prior year data.

*** Aggregate of cost of materials and value of shipments includes extensive duplication, since products of some industries are used as materials by others (see appendix).

Note: Beginning in 1978, the Bureau of Labor Statistics enlarged its sample base and revised the methodology for estimating the Consumer Price Index. A second index was begun for all urban consumers.

* These data are based on the old method treatment of homeownership. See footnote (**) for explanation.

** Effective with release of indexes for January 1983, the Bureau of Labor Statistics changed the way homeowner costs are measured in the CPI-U to rental equivalence. The rental equivalence approach calculates homeowner costs of the shelter based on the implicit rent owners would have to pay to rent the homes they own. The old method calculated homeowner costs as home purchase, mortagage interest costs, property taxes, property insurance, and maintenance and repair.

* When no response was obtained for annual miles, data were imputed.
** Detail does not add to totals because items were not applicable or multiple responses were possible.
*** When no response was obtained, one truck was imputed based on body type of sampled vehicle.
**** Pickups, panels, and vans are not included.
(Z) Represents less than 50 trucks, or 500,000 miles depending on the column in which it appears.
